Multi Vitamins & Vitamin Blends

promoting health,
enhancing beauty
with unique formulations
for all the family...

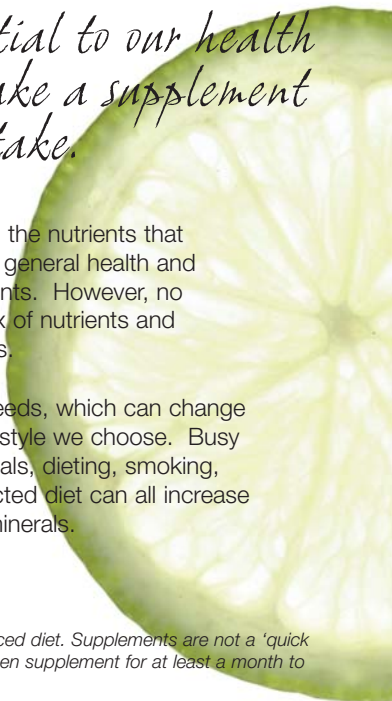

Nutrients are essential to our health and many people take a supplement to optimise their intake.

A healthy, varied diet will provide all the nutrients that most people need to help maintain general health and well being without taking supplements. However, no single food contains the perfect mix of nutrients and you need a variety of different foods.

Everyone has different nutritional needs, which can change throughout life as a result of the lifestyle we choose. Busy and stressful lifestyles, skipping meals, dieting, smoking, drinking alcohol and eating a restricted diet can all increase the need for certain vitamins and minerals.

Supplements are not a substitute for a balanced diet. Supplements are not a 'quick fix' and we recommend continuing your chosen supplement for at least a month to see the benefits. Take with/after food.
